Dev Kabir

WordPress Plugin Developer | PHP & JavaScript Specialist | 150+
Plugins Developed
Barisal Sadar Upazila, Barisāl, Bangladesh

Summary

Hi there! I'm Dev Kabir, and I love making WordPress plugins! These
are special tools that help websites work better and make things
easier for people. I've been doing this for more than 4 years and
have made over 150 plugins for different people and businesses.
These plugins help save time by doing tasks automatically so people
don't have to.

I also know how to use PHP, HTML, CSS, JavaScript, and MySQL,
which are different tools that help me build these plugins and make
them work well.

Besides my main job, I also work on Fiverr as a freelancer, where
I've completed over 38 projects. All my clients have given me a 5-
star rating because they're happy with the plugins I've made for
them.

I'm always learning new things and looking for fun projects to create
even more awesome plugins. If you want to work with me or learn
more, you can reach out by email, phone, or check out my portfolio.
Thanks for reading!

_____

Experience

WPMU DEV
WordPress Plugin Developer
March 2024 - Present (1 year 2 months)
Birmingham, Alabama, United States

- Writing clean, maintainable, and efficient code for WordPress plugins, used
by thousands of users to improve their websites.
