Summary

I am a Senior Web Developer and WordPress Specialist with more than five years of experience. I build scalable web applications and fast, reliable WordPress plugins.I currently work as a WordPress Plugin Developer at WPMU DEV. I help develop and maintain large plugins such as Defender and Beehive, which are used by tens of thousands of websites.My main skills include:• Web Development: PHP, JavaScript, React.js, Vue 3, HTML5, CSS3, and Tailwind CSS• WordPress: Custom plugin development, REST API integration, WP-CLI, and performance optimization• Backend and Databases: MySQL, Node.js, and custom API developmentI enjoy building complex web solutions and improving existing WordPress systems. My main focus is clean code, strong performance, scalability, and a smooth user experience.

Experience

WPMU DEV

WordPress Plugin Developer
March 2024 - Present (2 years 8 months)
Birmingham, Alabama, United States

- Migrated core plugin structure from Vue 2 → Vue 3 (Composition API), modernizing architecture and reducing technical debt across 60K+ lines of code.
- Contributed to Defender (security) and Beehive (analytics) — plugins with tens of thousands of active users.
- Regularly ship incremental updates, bug fixes, and UX improvements in a CI/CD pipeline with peer code reviews.
- Collaborated with a distributed, international team, aligning with open-source best practices.

WordPress

Plugin Developer
January 2022 - Present (4 years 10 months)

- Created a CORS error-solving plugin, adopted by 6,000+ websites worldwide, improving accessibility and user experience.
- Engaged with the open-source WordPress community by maintaining and updating plugins, providing long-term support and documentation.

Fiverr
WordPress Plugin Developer
January 2020 - Present (6 years 10 months)

- Delivered 38+ custom WordPress plugins with consistent 5-star client ratings.
- Specialized in WooCommerce integrations, creating plugins that connected WooCommerce with third-party services via REST APIs (e.g., payment gateways, shipping providers, CRMs, and analytics platforms).
- Designed secure, scalable APIs and ensured smooth data synchronization between WooCommerce stores and external systems.
- Collaborated with international clients across different industries, adapting to diverse requirements in a fully remote and distributed setup.
- Gained strong experience in debugging complex API issues, improving reliability of e-commerce workflows for clients.

Education

IDB-BISEW IT Scholarship project
Diploma in Web Application Development, Laravel, React, Vue.js & WordPress · (August 2018 - August 2019)
